Certifications

Introduction to Front-End Development By Meta04/2024to04/2023

Core web development technologies like HTML and CSS and get opportunities to practice using them. Introduced to modern UI frameworks such as Bootstrap and React that make it easy to create interactive user experiences.

Programming with JavaScript By meta04/2023to04/2023

This course has given me a strong grasp of JavaScript, the language behind the modern web. I've gained fundamental knowledge in web development, working with key concepts like functions, objects, arrays, variables, data types, and the HTML DOM. I've also explored interactive features of modern JavaScript.

Version Control By Meta04/2023to04/2023

This course has equipped me with essential skills for global software collaboration. I've learned version control systems, effective development workflows, and key Linux commands for file management and automation. This certificate highlights my commitment to efficient development practices and streamlining workflows for increased productivity.

HTML and CSS in depth By Meta06/2023to06/2023

This course covers HTML for building web pages and semantic data, CSS for styling, Bootstrap for layouts and themes, and debugging techniques.

React Basics06/2023to06/2023

Learn React, a powerful library for web and mobile app interfaces. This beginner-friendly course covers key React concepts, enabling you to build dynamic apps and websites with ease.

Advanced React By Meta06/2023to06/2023

Master advanced React concepts, JSX, and testing for confident application development. Learn to render efficiently, manage shared state, fetch remote data, use advanced hooks, and more. This course assumes basic knowledge of React, HTML, CSS, and JavaScript.

Principles of UX/UI Design By MeTA09/2023to09/2023

Learn UX/UI fundamentals, creating user-friendly digital products.

By course end, you'll:

- Design user-centric products
- Evaluate UX/UI quality
- Create and test designs
