ANGEL QUINTERO

954-612-5254   gabrielquintero1221@gmail.com

I'm a dedicated software developer specializing in frontend development. My primary focus revolves around crafting engaging and functional user interfaces, leveraging cutting-edge technologies to achieve optimal results. With a keen eye for design and a passion for innovation, I actively drive the creation of immersive digital experiences that captivate users and foster meaningful interactions. I encourage you to delve into my portfolio to witness firsthand the projects where I've brought ideas to life and transformed concepts into compelling digital solutions that leave a lasting impression. Let's collaborate and turn your vision into reality.

WORK EXPERIENCE

Front End Developer- Intership

09/2023 to Present

Helping Hands Fundation

-Key Responsibilities:
 - Conceptualizing and crafting intuitive and engaging user interfaces using Figma to optimize user experience.
 - Developing frontend components with ReactJS to implement functional and visually captivating features.
 - Ensuring seamless cross-device responsiveness of all application components to cater to diverse user needs.

- Collaborative Efforts:
 - Actively participating in sprint planning sessions and daily stand-ups to maintain project alignment and momentum.
 - Cultivating a collaborative environment that fuels creativity, innovation, and continuous improvement.

- Objectives:
 - Driving significant contributions to project milestones and objectives through effective teamwork and individual initiative.
 - Advancing skills in frontend development and UX/UI design by actively engaging in practical experiences and seizing learning opportunities.

Freelance Web Developer

09/2023 to 11/2022

HappyTailsPetsSpa

Plantation, FL

As a freelance developer, I spearheaded a project to craft a captivating landing page for a pet grooming business, harnessing React, CSS, and JSX. Through close collaboration with the client, I conceptualized and executed a visually stunning design aimed at captivating potential customers and promoting the business's services.

- Key Achievements:

- Engineered a responsive and visually enticing landing page using React, CSS, and JSX, ensuring flawless functionality across all devices.
 - Integrated custom design elements and animations to elevate user engagement and spotlight essential business offerings.
 - Collaborated closely with the client to discern their vision and requirements, delivering a bespoke solution that surpassed expectations.

This freelance endeavor provided me with invaluable experience in frontend development and bolstered my proficiency in delivering impactful solutions that align with and exceed client expectations.
